PROFESSIONAL SUMMARY

Data-driven **Junior Data Analyst** with strong foundation in **SQL, Python, Power BI, Spark, and Azure**, specializing in transforming complex datasets into actionable business insights. Proven ability to build **ETL pipelines, dashboards, and analytical models** that support data-driven decision-making across healthcare, consulting, and commercial domains.

EDUCATION

Coventry University, UK

MSc in Data Science and Computational Intelligence

Guru Nanak Institutions Technical Campus, India

Bachelor's in Computer Science - Data Science

PROJECT EXPERIENCE

Deep Learning–Based Medical Imaging Framework for Rare Disease Detection and Classification — Python, Deep Learning

- Built and evaluated deep learning models (EfficientNetB0, ResNet50) to classify 10 rare neurological and muscular diseases from MRI data.
- Achieved 68.20% accuracy and weighted F1-score of 0.67, using ROC-AUC, confusion matrices, and Grad-CAM interpretability to support transparent clinical decision-making.

Incremental Data Loading & Change Data Capture — Azure Data Factory

- Developed incremental ETL pipelines using ADF, Azure SQL, and Data Lake, reducing data latency by 60%.
- Implemented CDC mechanisms to minimize duplication and optimize storage by 40%.

Client-Specific Data Extraction from Cloud SQL — Apache Spark, SQL

- Engineered Spark-based retrieval system for 10M+ records, reducing query execution time by 35%.
- Designed reusable SQL modules that improved data accessibility for business clients.

Workforce Analytics & Training Performance Visualization — PySpark, Tableau, Python

- Analysed large-scale employee workforce data to identify demographic, training, and departmental trends using PySpark and Python
- Applied preprocessing and feature engineering to enhance predictive performance.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Data Visualization Tools: Power BI, Tableau, Excel (VBA), Looker

ML Tools: Pandas, NumPy, Scikit-learn

Cloud & ETL: Azure Data Factory, Azure Data Lake, Apache

Spark Databases: Azure SQL, MongoDB

Core Skills: EDA, Feature Engineering, Data Cleaning, Classification & Regression Models

PROFESSIONAL EXPERIENCE

WIPRO – Java Full Stack Internship

- Developed responsive web interfaces using HTML, CSS, JavaScript, and MongoDB.
- Delivered a full stack web application with user authentication and CRUD features.
